Plastic Waste: Don’t lose your bottle

With only 16% of global plastics recycled, society is under pressure to address plastic waste. We believe PET bottles are here to stay, though significant investment is required in its waste management. We expect consumer deposit schemes and emerging recycling technology to support the transition to a circular economy for PET.
The plastics industry is undergoing a revolution as it seeks to address the c.160m metric tonnes of plastic waste which leaks into the natural environment or ends up in landfill each year, representing more than 55% of the total plastic waste produced. We view PET plastic packaging — and in particular beverage bottles — as pivotal to this issue: it constitutes more than 10% of plastic waste. However, since PET bottles provide significant advantages (weight, durability and versatility) over alternative materials, we believe that they are here to stay, unlike other single-use plastics which have been subject to widespread bans. Heightened consumer awareness is forcing companies and governments to set ambitious recycling targets, but PET waste management will have to adapt in order for these targets to be met. To boost low collection rates and poor PET recycling yields, we view a Consumer Deposit Scheme as the policy instrument of choice, further supported by emerging technology. In this report we focus on PET plastic packaging and the recycling infrastructure required to support its long-term use within the circular economy. We argue PET should be viewed as an opportunity, with the demand for high-quality recycled PET likely to incentivize investment across the PET waste management value chain.

We believe Consumer Deposit Schemes and emerging technology will support the transition to a circular economy

Consumer Deposit Schemes

A Consumer Deposit Scheme is a policy tool that is being considered by the UK government. They are popular as they would help boost collection rates of plastic waste and reduce the contamination of waste, which in turn improves recycling rates.

Emerging technology

Innovative chemical and biological recycling technologies can be used to boost yield and extract value from plastic waste which would otherwise go to landfill or be incinerated. This technology will complement the improvements to recycling rates resulting from the use of consumer deposit schemes.

Consumer, companies and regulators are also pursuing the plastic waste agenda

So far, the plastic revolution has been predominantly consumer led, after documentaries such as ‘Blue Planet’ (BBC), highlighted the extent of environmental damage caused by plastic waste. These consumer concerns over plastic have encouraged companies to set ambitious targets in respect of plastic recycling. We note that companies such as Coca-Cola has pledged to include 40% recycled material in their bottles by 2020 and 50% recycled material by 2025. Meanwhile regulators are mandating minimum recycled PET content in bottles: the EU will require 50% minimum rPET content in bottles by 2030. Consumer Deposit Schemes and emerging technology will be critical to help companies meet these ambitious targets.
Unwrapping the PET issue

The PET packaging industry is currently worth over $50bn (4% CAGR)

With 160mn tonnes of plastic waste leaching into the environment each year…

160mn tonnes

…plastic bottles have become the symbol of the Blue Planet effect

Out of all the plastics, PET is pivotal to the issue, as it constitutes >10% of plastic waste…

The 7 types of plastic

PET is here to stay…

✓ Lightweight
✓ Strong
✓ Cheap
✓ Versatile

Recycling is the way forward…

Reality vs. Ambition: Recycling rates are low when compared to ambitious targets set by companies and regulators

1,705kg CO₂ saved per tonne of PET that is recycled and not sent to landfill

Reality

Global plastics recycling rates

Recycled 16%

Landfill or dumped 60%

Incinerated 24%

Ambition

Minimum recycled PET content in bottles by 2030

Coca-Cola Pepsi AG Barr EU Commission

Company & Regulatory Targets

30% 50% 0%

Reality

Global plastics recycling rates

Ambition

Minimum recycled PET content in bottles by 2030

Coca-Cola
Pepsi
AG Barr
EU Commission

Company & Regulatory Targets

30% 50% 0%

…however PET recycling rates must increase

Despite the preference for recycling PET, it is unlikely to yield 100% rPET due to three key pressure points

Stage of the waste management chain

PET waste available → PET collected → Waste sorted to extract PET → Recycled to rPET → Unrecycled and unsorted waste incinerated

Three key pressure points

1. Low PET collection rates
2. Contaminated PET
3. Limited rPET generation

Tackling PET plastic waste

Policy and tech advances to provide scalable solutions

Policy: All roads lead to a Consumer Deposit Scheme (CDS)
An industry-led initiative with stakeholders across the value chain to boost collection of good quality PET waste.

Emerging technology: Boosting recycling rates
Emerging chemical and biological recycling technology can recycle contaminated PET that would otherwise go to landfill and/or be incinerated.
Barclays

This communication has been prepared by Barclays. "Barclays" means any entity within the Barclays Group of companies, where "Barclays Group" means Barclays Bank PLC, Barclays PLC and any of their subsidiaries, affiliates, ultimate holding company and any subsidiaries or affiliates of such holding company.

Conflicts of Interest
Barclays is a full service investment bank. In the normal course of offering investment banking products and services to clients, Barclays may act in several capacities (including issuer, market maker and/or liquidity provider, underwriter, distributor, index sponsor, swap counterparty and calculation agent) simultaneously with respect to a product, giving rise to potential conflicts of interest which may impact the performance of a product.

Not Research
The information provided does not constitute 'investment research' or a 'research report' and should not be relied on as such. Investment decisions should not be based upon the information provided.

Barclays Positions
Barclays may at any time acquire, hold or dispose of long or short positions (including hedging and trading positions) and trade or otherwise effect transactions for their own account or the account of their customers in the products referred to herein which may impact the performance of a product.

For Information Only
This information has been prepared by the Research Department within the Investment Bank of Barclays. The information, analytic tools, and/or models referenced herein (and any reports or results derived from their use) are intended for informational purposes only. Barclays has no obligation to update this information and may cease provision of this information at any time and without notice.

No Offer
Barclays is not offering to sell or seeking offers to buy any product or enter into any transaction. Any offer or entry into any transaction requires Barclays' subsequent formal agreement which will be subject to internal approvals and execution of binding transaction documents.

No Liability
Neither Barclays nor any of its directors, officers, employees, representatives or agents, accepts any liability whatsoever for any direct, indirect or consequential losses (in contract, tort or otherwise) arising from the use of this communication or its contents or reliance on the information contained herein, except to the extent this would be prohibited by law or regulation.

No Advice
Barclays is not acting as a fiduciary. Barclays does not provide, and has not provided, any investment advice or personal recommendation to you in relation to any transaction and/or any related securities described herein and is not responsible for providing or arranging for the provision of any general financial, strategic or specialist advice, including legal, regulatory, accounting, model auditing or taxation advice or services or any other services in relation to the transaction and/or any related securities described herein. Accordingly Barclays is under no obligation to, and shall not, determine the suitability for you of the transaction described herein. You must determine, on your own behalf or through independent professional advice, the merits, terms, conditions and risks of any transaction described herein.

Not a Benchmark
